

Lightweight foam gun

Properties

- Lightweight (660 grams)
- Very robust
- Glass fibre reinforced PA66 spray gun (FDA)
- EPDM rubber cover
- EPDM/VITON seals (FDA)
- Rotary plastic foam wand
- Stainless steel spring and axle
- Stainless steel control lever
- Fixed rubber grip
- Max. 12 bar 50 °C
- Connection ½" BSP female thread

Reference: AKNLFW2

Generates excellent quality foam at low water pressure without air pressure

The performance is good from 2,5 bar and exceptional from 3,5 to 4 bar. De foam wand has a broad shaped exit and generates a broad foaming beam for efficient cleaning of larger surfaces. The same foam wand can be used to rinse the foamed surfaces.

The system is also available in two separate parts: a stainless steel, brass (chromium-plated) or a plastic wash down gun with a stainless steel quick release coupler, and a foam wand with a quick release adapter (see picture below).

LANFA02

- AKRLCP2-B Stainless steel
- AKCLCP2-B brass chromium-plated
- KLMLCP2-B brass
- AKNLCP2-B PA66
