

AK30550A3 NiTO II Heavy-duty water gun

The NiTO II spray gun is thermally insulated and has an adjustable spray angle, from narrow to wide (60°). Suitable for "heavy-duty" applications with a water temperature up to 90 °C and a flow rate of 40 L/min. It is equipped with 3/4" BSP female thread, and the operating handle is lockable to prevent unintended use.

Technical data

Max working pressure: 25 bar

Max temperature: 90 °C

Max flow rate: 40 L/min.

Features:

- Complete linear flow control - from low to high flow
- Adjustment from narrow to wide spray pattern (60° angle)
- Trigger with on/off and lock function
- 3/4" BSP female inlet
- Can be connected to 1/2" or 3/4" hoses
- 700 gram in weight

The AK30525A3 comes standard with a nozzle with a capacity of 40L/min. A separate set of nozzles is available for the AK30525A3. This allows you to increase or decrease the capacity of the gun. The separately available set includes nozzles with a capacity of 20L/min, 30L/min and 60L/min and an Allen key.
